

# Infrastructure Engineer

Kansas City, KS  
*Infrastructure*

## Job Description

This role is responsible for assisting the Director of Infrastructure by executing projects within our ERP system that make our operations run more efficiently. This role will also liaise between Striem and our IT infrastructure providers.

## Responsibilities

- Develop and maintain internal IT Glue notes for all systems used in operations
- Develop and maintain SharePoint sites for company and each department
- Develop and maintain uniform, efficient use of Microsoft applications across the company
- Internal help desk
  - Troubleshoot resolution internally
    - Server errors & reboots
    - Services errors & reboots
  - Submit ticket with vendor if unable to resolve
- Assist Director of Infrastructure with managing continual labor data collection through surfaces on manufacturing floor and connection to ERP system
- Assist Director of Infrastructure with research & testing of new modules and functions in ERP system
- Other duties as assigned

## Qualifications

- Attention to detail and highly organized
- 1-3 years of relevant work experience preferred but not required
- Bachelor's degree or equivalent practical experience
- Proficiency in SQL Data Management
- Proficient in Microsoft Administration & Office Products
- Proficiency in Crystal Reports
- Excellent analytical skills
- Forward-thinker who can bring creative ideas to the organization
- Sense of humor

## Area

The Infrastructure team helps the organization's heart beat. The team is continually searching for ways to make processes more efficient, namely as it pertains to our ERP system.

## About Striem

Striem manufactures oil separators, solids interceptors, and chemical waste tanks. Our formula is simple: build quality products, ship them quickly, and provide incredible customer service. Our philosophy is to be happier this year than last. We'd like you to join us.
