

Manufacturing Engineer

Kansas City, KS

Production

Hours: 6:30 am – 3:00 pm

Reports to: Director of Manufacturing

Job Description

Sound engineering is the foundation that our organization is built on. This notion extends to our production floor. The Manufacturing Engineer figures out methods to manufacture our products more efficiently while keeping safety in the forefront. We are looking for someone who can visualize a better method to produce a product and execute on that method.

Responsibilities

- Design, build, and maintain jigs
- Ensure workstations are designed to optimize efficiency and maneuverability
- Observe build processes and continually improve them
- Conceptualize and implement more efficient floor plans
- Minimize manufacturing waste without compromising efficiency
- Learn and maintain shop machinery, including extruders and welders
- Understand and foster a LEAN production environment
- Support Director of Manufacturing with ad hoc assignments
- Ensure tooling is replaced or fixed timely at all workstations

Qualifications

- Excellent communication skills
- Extremely high attention to detail
- Experience with “getting your hands dirty”
- Proficient with Microsoft Word, PowerPoint, and Excel
- Understanding of lean manufacturing
- Ability to lift 75 lbs., unless you can figure out a way not to
- Ability to adapt quickly
- Sense of humor

Area

The Production Team encompasses Fabrication, Machine Operation, Shipping & Receiving, Purchasing, Production Planning, and Quality Control. The Manufacturing Engineer is responsible for making eyeing efficiency initiatives within these departments.

About Striem

Striem manufactures oil separators, solids interceptors, and chemical waste tanks. That’s it. Focus is our friend. Our goal is simple: be the industry leader in all three categories. We’d like you to join us.
